

JOEL BUDDEPU

Visakhapatnam, India | +91 8056996954 | jbuddepu@gitam.in | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

OBJECTIVE

Results-driven B.Tech Computer Science student (3rd year, GITAM University) with demonstrated experience in Python and full-stack web development, including a live production-deployed application. Cisco-certified in Python Essentials (PCEP + PCAP). Seeking a remote Summer 2026 internship to engineer scalable applications, deepen problem-solving expertise, and drive impact on meaningful software projects.

EDUCATION

B.Tech – Computer Science & Engineering

2023 – 2027

GITAM University, Visakhapatnam • CGPA: 7.64 / 10.0 • 3rd Year (Pre-Final)

SKILLS

Languages & Frameworks: Python (Advanced), HTML, CSS, JavaScript

Tools & Platforms: VS Code, Git, GitHub, GitHub Copilot, Render (cloud deployment)

Concepts: Full-stack web development, REST APIs, OOP, data structures, exception handling

Soft Skills: End-to-end project ownership, self-directed learning, deadline management, technical documentation

ACADEMIC / PERSONAL PROJECTS

University Parking Management System [↗ Live Demo](#)

Jan 2026 – Mar 2026

- Engineered a full-stack parking management system using Python, HTML, CSS, and JavaScript, enabling real-time slot tracking and vehicle record management for a campus-scale user base.
- Architected a responsive, device-agnostic UI with dynamic state updates, improving accessibility across desktop and mobile browsers.
- Deployed the application end-to-end on Render's cloud platform, configuring the production environment, environment variables, and CI pipeline for reliable uptime.
- Owned the complete SDLC — requirements analysis, system design, iterative development, QA testing, and production release — delivering the project independently within a 3-month timeline.

CERTIFICATIONS & TRAINING

Python Essentials 2 (PCAP) – Cisco Networking Academy

Feb – Mar 2026

- Applied advanced OOP principles (classes, inheritance, polymorphism) and file I/O for structured data processing.
- Implemented functional programming constructs: generators, lambda functions, and closures within modular Python packages.

Python Essentials 1 (PCEP) – Cisco Networking Academy

Jan – Mar 2026

- Developed strong foundations in Python: data types, control flow, functions, and collection handling (lists, tuples, dicts).
- Implemented exception handling and I/O operations; established coding discipline applied directly to project work.

EXTRACURRICULAR ACTIVITIES

-
- Continuously upskill through self-study on emerging technologies and online learning platforms.
 - Regularly solve algorithmic challenges on competitive programming platforms to sharpen DSA and problem-solving proficiency.

ADDITIONAL INFORMATION

-
- Certifications: Python Essentials 1 & 2 — Cisco Networking Academy (PCEP + PCAP).

- Interest: Full-stack and web software engineering; passionate about building production-ready systems.
- Independently architects and ships end-to-end projects — from ideation and system design through deployment and documentation.
- Availability: Open to remote summer internships from May 2026.
